

QUALITY POLICY

PEDRINI SPA has always designed and manufactured machines, lines and systems for the processing of marble and granite with high performances and excellent quality levels both for the domestic and the international market.

The decision to implement a Quality Management System certified according to the UNI EN ISO 9001:2015 confirms, reinforces and improves the actions and commitment in this respect of the Management and of all the company staff.

The professionalism, the services quality, the constant trend to improve, in synergy with the technological innovation and research, are the strengths of the company's activity. Given the continuous evolution of the market, being chosen and appreciated means to stand out for efficiency, quality and performances.

With the Quality Management System, PEDRINI SPA aims to achieve substantial and measurable results in the company strategic targets.

In carrying out its mission PEDRINI SPA:

- shares, communicates, plans and periodically reviews its targets;
- identifies internal and external factors for the achievement of its strategic targets and of the expected results of the Quality Management System;
- adopts a risk management approach and intends to put in place the appropriate actions to deal with both the potential risks and the opportunities for each business target and process identified in the System.

A quality approach which aims to the continuous improvement of the performance of all business processes and the entire supply chain produces greater efficiency and flexibility and improves the corporate's image and economic results.

The Management engages in taking an active role in the promotion of all the activities which influence the Quality of the product, of the service and of the processes that underpin them, through:

- the spreading and knowledge, at all levels and for all the interested parties, of the concepts expressed in this document;
- the full availability of means and resources necessary for the establishment and maintenance of its Quality Management System;
- the arrangement of a plan to monitor specific targets related to strategic targets.

The Quality policy is reviewed on the occasion of the Quality System Review by the Management in order to adapt it to any changed regulatory, technological, organizational, economic and social conditions.
